

ASA Electronics® Announces Brand New Jensen® Touchscreen Stereo

FOR IMMEDIATE RELEASE

ELKHART, IN. – ASA Electronics unveils the newest addition to the Jensen line, the JRV4100 Touchscreen Multimedia System. The JRV4100 pulls double duty as both a fully-loaded in-dash stereo and a full-color observation monitor to save valuable space in the cockpit.

The stereo boasts a 6.2-inch TFT touch screen display for easy control of system settings and functions. Choose from an array of listening options like Bluetooth streaming, MP3 and WMA playback via USB, front auxiliary input, and radio with 18 preset stations. RV owners can listen to their favorite tunes with 4 x 40 watt audio output for quality sound throughout the RV.

In addition to entertainment, the JRV4100 has the RV's observation needs covered. A rear camera input and auto-trigger wire make this multimedia system compatible with virtually any wired Voyager camera. The auto-triggering technology automatically shows the camera image on the screen when the RV is put in reverse, allowing the driver to see what's behind them without having to adjust any settings.

The fully-functional touchscreen is complemented by tactile buttons along the right-hand side of the screen, allowing for menu shortcuts as well as a volume knob for ease of use.

ASA Electronics® has been designing and manufacturing mobile electronic products for the Marine, RV, PowerSports, Agricultural, Construction, Commercial Vehicle, and Bus industries since 1977. Their proprietary brands are JENSEN®, JENSEN Marine®, JENSEN Heavy Duty®, iN·Command®, Marine Audio®, Voyager® and ADVENT® Air.
