iN•Command with Global Connect Debuts on Winnebago Minnie Plus

FOR IMMEDIATE RELEASE

ELKHART, IN. – ASA Electronics is pleased to announce our latest iN•Command Control system will come standard on 2019 Minnie Plus travel trailers and fifth wheels.

iN•Command with Global Connect will give Winnebago owners unprecedented control of their RV from virtually anywhere in the world.

“Winnebago has been a household name in RVing for decades and we’ve done that by building innovative, quality RVs. iN-Command with Global Connect is not only the future of RVing, but it’s a reliable product from a reliable company,” said Product Sales Manager Adam Christoffersen.

The fully-functional iNCommand app turns any Android and iOS devices into a wireless remote control. Using a combination of Bluetooth, Wi-Fi, and cellular technology, Minnie Plus owners will now be able to control select motorized, lighting, and monitoring functions right from their smartphone. New with Global Connect, iN•Command also provides complete climate control, including scheduling.

“ASA Electronics has had the pleasure of working with and supplying products to Winnebago for more than 25 years. We’re very excited that they’ve decided include iN•Command in that long-standing relationship and we sincerely hope the Minnie Plus is just the beginning,” said Jeff Gray, National OEM Sales Account Manager of ASA Electronics’ RV and Trailing Division.

Winnebago will be showcasing their 2019 Minnie Plus line at the Elkhart Open House, Monday, September 24th through Thursday, September 27th.

ASA Electronics® has been designing and manufacturing mobile electronic products for the Marine, RV, PowerSports, Agricultural, Construction, Commercial Vehicle, and Bus industries since 1977.
